

# VAMSO BIOTEC PVT. LTD. JOINS HANDS WITH KEMIRA CHEMSOLUTIONS

As a part of its strategic alliance to give a better customer service and to cover untapped business segment, Vamso Biotec Pvt. Ltd. has joined hands with Kemira ChemSolutions for marketing of Kemira range of products in India and Nepal.

Kemira is the leading global producer of high quality organic acids based

products for the food and feed industry. Kemira, a European giant in acidifier segment holds No. 1 position in Food and Feed industry globally and in Asia Pacific region. Kemira is the largest producer of calcium propionate and second largest producer of formic acid in the World. Kemira is one of the few basic manufacturers of acidifier in the world with its state of the art manufacturing units situated in Oulu (Finland) and Tiel (the Netherlands). Kemira manufactures high quality acidifiers for food and feed industry that has FAO and European Food Safety Authority (EFSA) approval. Kemira puts a lot of science in the products to make them more concentrate, stable and non-corrosive. The synergistic combination of acids used in the products gives a broad anti-microbial coverage throughout the intestinal tract. Kemira has also mastered the science of

combining Short chain fatty acids (SCFAs) and medium chain fatty acids (MCFAs) for the control of both gram negative and gram positive pathogens.

Vamso Biotec Pvt. Ltd. would be marketing Kemira Performance Enhancement range of acidifiers for feed and water application. With the innovative and scientific range of acidifiers in Indian poultry market the customers would get an effective tool to tackle the problems of GIT pathogens with enhancement in the poultry productivity and profitability. The poultry industry can also curb the menace of antibiotic resistance and residue giving a better outlook to the food safety without compromising on poultry health. The industry would also be able to control the subclinical and clinical problems associated with gram positive pathogens.
